Package Components

- ☐ data: Saves data preloaded in package
- ☒ data-raw: raw version ex: .csv files of the data in
  - ☐ data
- ☐ man: help files get saved. roxygen2 rules to make documenting/creating help files easier

  ↑ Do not edit

- ☐ R: - Source code for all functions in pkg
  - roxygen2 code to create all help files: both functions & data sets
- ☐ tests: Unit testing Punt for now ignore
- README.Rmd: Source code of README welcome page
  - knit → README.md artefact
    ↑ do not edit

DESCRIPTION: Gives pkg info
authors, what other
pkgs are required,

---

① Building/installing & ②testing/checking
pkg.
library(devtools)
① install() ← do this often
② check() ← do this often enough
so that errors &
warnings don't
snow ball

Two ways to install a package
① directly off GitHub
using devtools:: install_github()
② Upload to CRAN
& stricter requirements
